Sonotronics Receiver Software

Sonotronics software via the website [download page](#). To pass security checks, software is available as compressed zip files which should be saved in a suitable folder and then decompressed. PC compatible software is installed by selecting the .msi file. Adroid files are expressed as .apk files when expanded, and require the user to enable the “install unknown apps” permission.

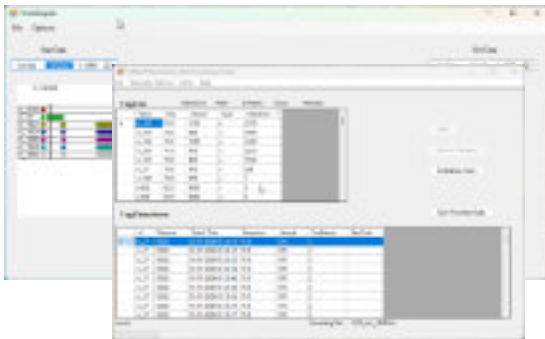

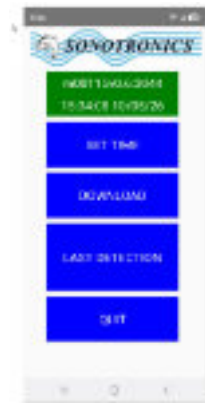

sonoBLEtool

This single tool provides configuration, download, and real-time testing for Sonotronics BLE devices, including the USR-23 active receiver, SUR22-BLE long life submersible receiver and the diminutive miniSURT submersible receiver.

Android tools

SONO SUR LINK allows Android users the ability to download data logged in Sonotronics BLE receivers including the SUR22-BLE, USR23, and miniSURT. Users may also use this tool to reset the onboard clocks of these receivers and perform real-time testing.

SURsoftDPC

Is a data management tool that allows data files loaded from multiple receivers and receiver types to be merged and assessed.

Users may also find support for specialty and legacy products on the [download page](#).
